EXPERIENCE

Land Survey CAD Technician

-Bill O'Hara, Land Surveyor – Bistrop, Texas (Remote) – CAD Contractor– 2 Years

-Surveying Consultants – Bluffton, South Carolina (Remote) – CAD Contractor – 2 Years

-LB1 Surveying & Mapping – Orlando, Florida – FT CAD Technician – 3 Years

-Leading Edge Land Services – Orlando, Florida – PT CAD Technician – 1 Year

-Seminole State College – Sanford, Florida - Drafting & Design Education, Training, and Certification

- Drafted complete Boundary surveys, Topographic surveys, As-Built surveys, ALTA/NSPS surveys, Wetlands surveys, Tree surveys, Land Survey Plats, Subdivision Plats, Plot Plans, Easement exhibits, Improvement Location Certificates, and more.

- Strong understanding of field data import processes, GIS import, Right-of-Way mapping, surface creation & management, 3D Point Cloud data management, generating, importing, and exporting KMZ files.

- Strong understanding of the purpose and verbiage of deeds, judgements, liens, and trusts. Proficient understanding of metes & bound descriptions, with the ability to both map out and write them from scratch.

- Extensive experience navigating municipal public records to source relevant project documents and title interest, property ownership, easements of record, legacy surveys, and determining soils, airspace, and water rights.

- Experience with subsurface utility location for the purpose of utility exhibits, utility relocation coordination, line crossings, and post construction as-built exhibits.

- Field experience collecting survey data, observation of site conditions mid-development, verification of materials and permitting, coordination with property owners, and post-construction inspections.

Civil Engineering CAD Technician & Designer

-Benham, A Haskell Company – Oklahoma City, Oklahoma (Hybrid) – Civil Designer– 2 Years (Current)

-Galloway & Company – Colorado Springs, Colorado (Hybrid) – Civil Designer – 1 Year (Relocation)

-Monument Valley Engineering – Colorado Springs, Colorado – CAD Technician – 2 Years

- Drafted complete Development Plans and Civil Construction Drawings, including Grading & Erosion Control Plans, Pond Plans, Utility Plans, Drainage Exhibits, Crossing profiles. Complete site design sets for public and private infrastructure, as well as transportation and utility relocation planning.

- Developed a greater understanding of the development planning process, industry relevant vocabulary, familiarity with industry standards, enhanced understanding of the construction process and contractor expectations through site inspections.

- Proficient in setting up sheet sets utilizing tools to make future project phases efficient and dynamic, integrating smart features that make later changes and revisions simple and cost effective to incorporate.

- Detailed understanding of surface modeling, pipe network creation and management, cross-discipline coordination and calibration of design.

- Experience creating and demonstrating bid solicitation presentations, summary of quantities and pay items, and design specification research.

- Experience with Religious, Healthcare, Federal, and Military projects of various complexities.

CERTIFICATIONS & SKILLS

- Working knowledge of AutoCAD, Civil3D, Revit, Illustrator, InDesign, Carlson iCAD, Leica CloudWorx 3D, Trimble 3D laser scanning, Adobe Suite, Bluebeam Revu, and Microsoft Suite.

- Technical Writing education to allow for particular and meaningful verbiage, enabling me to be a strong and effective communicator both verbally and written.

- Strong proficiency of general computer-based applications and hardware configuration, and an average typing speed of 150 WPM allows for an efficient workflow and effective communication.

- Extremely detail oriented taking great pride in my work being an exceptional representation of my employer and my personal skill in graphic design and content organization with a keen eye for symmetry.
